LETS JUST SKIP THE ENTIRE FIREBASE PART (LIKE AS IN LETS REMOVE ALL FIREBASE RELATED THINGS FIRST FROM THE CODES) SINCE ITS GETTING MESSY AND INSTEAD MAKE THE CREDENTIALS OF BOTH ADMIN AND USER LOGIN CONSTANTS:

For Admin:

Jena Runanes | Admin123

For User:

Desiree Lagman | User123

Notes:

- The "Create New Climb" button in the Dashboard section just redirects to the Open Climbs section to publish a new climb

- The "View" button in open climbs lets admins view participant number, the edit button edits climb details and the delete button obviously deletes the climb
- For the "Export" button in participants section, it doesn't really do anything...yet
